Re: DA 12-1863, IB Docket No. 12-340; RM-11683

Dear Secretary Dortch:

On behalf of S.I. Wireless, LLC dba MobileNation, I am writing in support of LightSquared's recent License Modification Application and its proposal to build a nationwide 4G LTE wireless network and operate it on a wholesale-only basis. SI Wireless is a facilities based cellular service provider whose service area consists of parts of central and western rural Tennessee and rural western Kentucky including the cities of Jackson, Tennessee and Paducah, Kentucky.

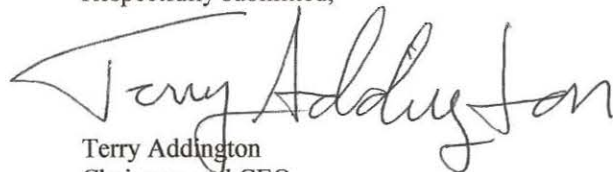

As the Commission knows well, our country's mobile wireless infrastructure must be sufficiently robust to not only handle current mobile wireless consumption but also encourage innovations, new goods and services. So long as there is access to sufficient bandwidth, the economic growth opportunities of mobile broadband are simply limitless. The challenge to American competitiveness in the global market is real, and much hinges on the Commission's ability to make spectrum available in a manner that unleashes the waves of innovation associated with additional mobile broadband capacity.

LightSquared's proposal to permanently relinquish terrestrial use of the "upper 10 MHz" and to share 5 MHz of federal spectrum in the wholesale provision of LTE service nationwide will enhance competition significantly by facilitating the ability of new providers to enter local, regional, and nationwide markets and serve customers. For example, LightSquared's planned network would immediately enable SI Wireless to partner with a national provider and immediately develop a 4G strategy that would benefit the customers of rural Tennessee and Kentucky. Without a partnership similar to what Lightsquared is offering, the roadmap for a company the size of S.I. Wireless to develop a nationwide 4G relationship for its customers is highly problematic.

More specifically, LightSquared's wholesale-only model will allow wholesale partners to overcome the high barriers to market entry – including potentially prohibitive network deployment and roaming costs, as well as spectrum scarcity – that could otherwise unduly raise operating costs, or preclude us from providing expanded coverage or innovative services altogether.

Hundreds of millions of American consumers would benefit from the competition, coverage and innovations that would be made possible by LightSquared's network. Accordingly, we urge the Commission to grant LightSquared's Application and proposal to deploy a wholesale-only LTE network as quickly as possible.

Respectfully submitted,
